

Soal Ujian Back End JC12

Code dan SQL script di push ke github.

1. Buat database dengan spesifikasi berikut dilengkapi dengan foreign key constraint di setiap tabel.

- Product : product_id(INT, PK, NN, AI), nama(varchar, NN), harga(INT, NN), imagePath(varchar, NN)
- Inventory : inventory_id(PK, NN, AI), product_id(INT, NN), store_id(INT, NN), inventory(INT, NNN)
- Store : store_id(PK, NN, AI), branch_name(varchar, NN)

2. Buat Endpoint untuk CRUD Product (dengan upload gambar) dan CRUD Store

3. Buat Endpoint untuk memenuhi kebutuhan UI dibawah

#	Product	Branch Name	Stock	Action	
1	Baju	Jakarta	50	Edit Stock Quantity	Delete Stock
2	Baju	Bandung	50	Edit Stock Quantity	Delete Stock
3	Baju	Bekasi	50	Edit Stock Quantity	Delete Stock
4	Celana	Jakarta	50	Edit Stock Quantity	Delete Stock
5	Celana	Bandung	50	Edit Stock Quantity	Delete Stock
6	Celana	Bekasi	50	Edit Stock Quantity	Delete Stock
#	<input type="text" value="Baju"/>	<input type="text" value="Jakarta"/>	<input type="text" value="Initial Stock"/>	<input type="button" value="Add"/>
